

# Gore Hill Data Centre

## Project Description

FDC was selected by LBD to deliver a purpose-built, state of the art Data Centre facility as the first building for their business precinct located at Gore Hill Technology Park.

FDC was presented with the challenge of coordinating the base build and fitout to simultaneously suit the requirements of a Top 50 ASX listed company. The fitout has a gross floor area of approximately 14,000sqm with 3,200sqm of dedicated data hall space; 1,600sqm of disaster recovery office space and 3,000sqm of related plant and equipment space, completed and commissioned ready for use. The building also has provision for a further 3,200sqm of data hall space and 3,000sqm of plant space in addition to the above.

This project was awarded a NSW MBA Award for Best Communication Building (Data Centre) in 2012.

## Project Features

- 64,000sqm dedicated data hall
- 1,600sqm disaster recovery space
