

# Governor Macquarie Tower & Governor Phillip Tower EOTF

## Project Description

FDC has completed the fitout of end of trip facilities (EOTF) at Governor Macquarie Tower, 1 Farrer Place, Sydney CBD.

Together with the Museum of Sydney, Governor Phillip Tower and Governor Macquarie Tower are the main elements of one of the largest developments in the **City of Sydney**. The buildings occupy an elevated site in the Central Business District's prestigious north-east area and incorporate the site of the first **Government House**, one of **Australia's** earliest and most significant National Heritage sites. In terms of finish quality and design, the buildings are regarded as achieving new standards for Sydney commercial architecture.

The 400sqm project was delivered within 12 weeks and involved the construction of an EOTF to service both the Governor Phillip Tower and Governor Macquarie Tower buildings.

Works included new showers facilities and lockers.

The project was executed in conjunction with Siren Design and Erbas.

## Project Features

- New shower facilities
- Lockers

## Project Size

400sqm

## Program

12 weeks
