

Hoepners Logistics

Project Description

The Hoepners Group of companies manages and coordinates the movement of goods and provides customised local and national logistics solutions to business solutions.

They have developed an extensive logistics infrastructure of warehouses and depots throughout Australia, with an advanced warehouse management system that is connected regionally, thus enabling business partners to enjoy full visibility of their operations at almost any time of the day.

In association with the previously constructed warehouse space, Hoepners required a modern office facility.

FDC were engaged by ING Real Estate to construct this facility, including a new entrance road to the Hoepners building, car parking and various alterations and improvements to the external façade of the existing building.

Project Features

- Improved external facade
- Car park
- New entrance road
- Modern office facility
