

# Northrop

## Project Description

FDC facilitated the design and construction of Northrop's new head office at Level 11, 345 George St, Sydney.

Northrop provides a range of engineering consulting services with offices in Sydney, Canberra, Newcastle, Wollongong, Central Coast and Brisbane.

FDC was able to give the client a cost effective solution by utilising some of the existing finishes in the new premises.

The services were designed by FDC Mechanical Services and FDC Technologies in collaboration with Northrop's own Mechanical and Electrical engineering departments. Both organisations worked seamlessly in order to deliver the entire fitout in only 5 weeks.

The 1,200sqm project was completed on time and within budget.

## Project Features

- Design and construct project
- New reception and extensive breakout area
- Extensive joinery
- FDC Mechanical Services assisted with this delivery

## Project Size

1,200sqm

## Program

5 weeks
