NECA Award Winner

MBA Award Winner

FDC Technologies delivered an array of power and lighting systems as a part of the Medtronic fitout.

Medtronic is a global leader in medical technology, alleviating pain, restoring health and extending life for millions of people around the world.

A multiple floor fitout, it encompassed warehouse, office, high-tech training rooms and laboratories. A Computer Room was constructed on Level 1 which provided the central point from which all fibre riser cabling plus voice and data copper backbone cabling radiated to each floor. FDC Technologies selected a Siemon cabling solution for Medtronic.

FDC Technologies delivered an array of power and lighting systems as a part of the fitout. From project conception until completion, FDC maintained a professional and proactive approach to the project, which resulted in an excellent outcome for all parties.
