

Henslow

333 Collins Street, Melbourne, VIC

CLIENT	Henslow
PROJECT SIZE	765sqm
PROJECT LENGTH	
YEAR COMPLETED	2017

FDC Construction & Fitout (VIC) were engaged by IA Design to deliver Henslow's new tenancy fitout in the iconic 333 Collins Street building.

Henslow is an independent advisory firm that partners with and supports growing companies, entrepreneurs, managers and investors by bringing together people, strategy and capital.

As a client-centric organisation, Henslow's brief sought an environment that was collaborative, relaxed and inviting for both staff and clients. The space needed to be multi-functional with two distinct areas between front-of-house and back-of-house, with a key focus on creating a vibrant entertaining area.

An "Airline Lounge" style front-of-house space allows Henslow to entertain clients, nurture and grow relationships, all whilst providing a high-performance advisory service.

The design process focused on creating a natural flow of movement throughout the tenancy. The brief included formal and casual meeting spaces, large kitchen and breakout areas, dual back of house entry / exit, bright space and an open plan workspace to encourage collaboration amongst team members.

FDC successfully delivered this project in conjunction with IA Design and Shead Management.
