Our FDC (QLD) team have delivered another excellent project for our national client, Hub Australia.

Our FDC (QLD) team have delivered another excellent project for our national client, Hub Australia.

The Hub Anzac Square Rooftop Project, situated at 200 Adelaide Street Brisbane, involved bringing the internal and external event space to life, creating a new and modern foyer with open meeting spaces, a strategy room and restroom facilities.

The external event space was designed to accommodate varying needs. The flexible outdoor space can act as a break out area as well as a conference space for up to 40 people. The internal and external spaces are linked by large bi-fold doors, with the total event area now able to accommodate 150 people.
