

Westpac Brisbane HQ

123 Eagle Street, Brisbane, QLD

CLIENT	Westpac
PROJECT SIZE	6,715sqm
PROJECT LENGTH	22 weeks
YEAR COMPLETED	2019

PROJECT FEATURES

5 floors of activity-based work environment;

Fire curtain design & installation;

Feature green wall with live plants;

Integration of live planting throughout all floors of the fitout;

Works complete within an occupied building / live environment;

Diverse power & communications pathways to a standalone Main Comms Room complete with contained hot isle, UPS & generator backup.

FDC have successfully delivered the Westpac Brisbane HQ under a design and construct contract.

FDC are proud to present the completed fitout of Westpac's new Queensland headquarters in Brisbane's Riverside Centre under a design and construct contract.

The high-end fitout has created a new workplace for Westpac to relocate from their current Brisbane office on Queen St, into a new state-of-the-art activity-based working environment which aligns with their national workplace standards.

The project is aspiring to achieve 6 star Green Star accreditation (yet to be received).

The striking fitout features the creation of a series of vertical connections being introduced into a complex slab and beam system that wasn't originally designed to have these openings, achieved through the introduction

of four unique staircases and walk bridges located throughout the multi-level workspace.

Sit-to-stand workstations, energy efficient services design and high-end joinery are also highlights of the project.

A standout feature is the green wall which heroes Westpac's logo, adding a vibrant and unique touch to the workplace.

This project is an excellent showcase of the high end fitouts FDC's QLD team are delivering.
