

Holdsworth House Medical Practice

116 Robertson Street, Fortitude Valley

CLIENT	Holdsworth House Medical
PROJECT SIZE	220sqm
PROJECT LENGTH	
YEAR COMPLETED	2017

PROJECT FEATURES

Artistic façade blending the use of steel panels, mirrored glass and stone

Custom joinery throughout

Smart storage solutions integrated into seating and bedding

FDC (QLD) have completed the refurbishment of Holdsworth House Medical Practice, 116 Robertson Street, Fortitude Valley.

Holdsworth House Medical Practice specialises in medical facilities for doctors, nurses and their patients with a focus on vaccinations and on-site pathology.

The two-storey refurbishment of the facility beautifully balances the medical equipment and the bespoke architectural features.

The custom joinery throughout the consultation rooms feature charming timber veneer designs but also maximises the use of space by integrating beds, storage and seats without compromising on functionality.

The artistic façade is comprised of steel panels, mirrored glass and stone.

FDC successfully delivered this project in conjunction with Twohill & James.
