Accountability	ESG Manager	ESG Manager	ESG Manager	ESG Manager	COO

Environmental, Social, Governance (ESG)

Senior Management Statement

Since our Founding in 1990, it is the safety and responsible management of our people and our environment, that will always remain our top priority.

“It’s not just what we deliver, but how we deliver that matters to us”.

The FDC ESG Strategic Framework 2026 - 2028 determines the key areas of our strategic focus and the Objectives, Actions, Outcomes and Governance of our Environmental, Social, Ethical and Sustainability practices.

These practices are embedded in FDC management systems and form an integral part of how we conduct our business.

Our management processes and systems are constantly reviewed and improved, to ensure that FDC remain best practice in everything we do and remain the partner of choice in the Australian building and construction industry.

FDC are aware of our responsibilities as a business, and the opportunities we have to use our sphere of influence to make a meaningful difference to the things that are important to us, our clients, and our communities.

Environmental, Social, Governance (ESG)

Senior Management Statement

FDC are committed to:

- Procure goods and services that are responsibly and sustainably, sourced and produced,
- Ongoing assessment and review of our Scope 1, 2 and 3 GHG Emissions and waste resulting from our business operations,
- Implement the most sustainable design and construction practices available to us to deliver the lowest emission, low waste, built product possible,
- Reduce the potential for human harm in the supply chains of the labour, goods, and services provided to FDC,
- Increase engagement with diverse and under-represented suppliers, to improve social outcomes and impact,
- Provide fair and equal opportunities for employment and career progression at FDC, free of any gender, social, cultural bias, or judgement,
- Create a supplier and employee base that best aligns with FDC values, and the expectations detailed in our own Code of Conduct and Ethics.

Our ESG Strategic Framework is fully endorsed by FDC Directors and Senior Management.

Gender Diversity and Equality

Senior Management Statement

The construction industry is the most male dominated workforce in Australia, and this brings with it inherent challenges and barriers to driving gender diversity. Our actions on Gender Diversity and Equality have significantly contributed to FDC being regarded as an employer of choice, attracting the strongest candidates available and offering the same market leading career opportunities, no matter your gender.

Gender Diversity and Equality is a key pillar of focus in the ESG Strategic Framework. FDC are committed to continue to take measures to ensure that we offer a workplace that is equal in opportunity and reward, and is supportive of the specific measures required to ensure that all current and prospective team members at FDC suffer no additional barriers or bias in beginning, continuing, or advancing their careers at FDC.

We acknowledge the commercial and social benefits to FDC, our team and clients of having a workforce that is rewarded equally on merit, balanced in its composition, and diverse in its thought. Staff retention, satisfaction, wellbeing, and collaboration are key contributing factors to the success of FDC over more than 35 years.

The pride in our reputation determines that we maintain and continually improve upon the practices that allow these factors to survive and thrive.

Gender Diversity and Equality

Senior Management Statement

FDC management constantly review our human resourcing practices to ensure that we offer a workplace that equally attracts, retains, and rewards the females in our industry and business. We acknowledge that a commitment to flexible work practices, and support at times of need and want, are key factors that FDC needs to offer, to ensure that we all feel valued and confident in our careers.

Our recent reviews have resulted in improvements to our policies and practices regarding issues such as Parental and Special Leave, Return to Work, Flexible Working, Recruitment and Retention, Maternity Leave (Doula) Support Program, Like/Like Remuneration Reviews, Carer Support, Anti-Harassment and Bullying, amongst others. We aim to ensure that there is no “gender adversity” in our business.

We are proud of the fact that the 20% female participation in our workforce exceeds that of the industry average. However, we acknowledge and plan that this level of participation needs to increase at both a quantum and corporate distribution level.

Our project and delivery teams all benefit from the diversity of thought and experience, that come from increased levels of female and cultural participation across those teams. We are proudly on track to achieve our target of having 15% of our Female employees in project delivery roles. The resulting benefits to our clients, our staff, and our business is what drives our ambition and determination to be the very best that we can be.

FDC have been compliance certified by the Workplace Gender Equality Agency (WGEA) since its inception and produce an annual WGEA Employer Statement.

We are proud that by our actions and reputation, FDC remain an employer of choice in the Australian building and construction industry.
